BE CREATIVE BY COMBINING WAVE & WEB DESIGNS
WITH THE PLAIN COLORS OF THE TURBO TILE COLLECTION

TURBO ART TILE WAVE & WEB DESIGN

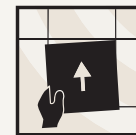

Turbo Art Tile is an innovative Needtile concept which gives you the possibility to combine the color range from the Turbo Tile collection with these two creative ranges of the Turbo Art Tile.

The Wave and Web design remind us of the rhythm of the music. The design technique used on these tiles is subtle and gives a touch on the floor which makes our Art tiles elegant, sophisticated & timeless. Floor designers can play with this concept to give the room that extra design touch. The color palette gives you a wide range from jazzy brown shades, techno greys, indie blue & funky red.

Be creative by combining Wave & Web designs with the plain colors of the Turbo Tile collection!

FACTS & FIGURES

- The Turbo Art Tile is available in **2 designs: Wave & Web.**
- Wave and Web design are both **available in 7 colors.**
- **Fully combinable** with the 9 colors of the Turbo Tile collection.
- The plain Turbo collection is **also available in rolls.**
